SUMMARY

Professional with interdisciplinary experience spanning digital cultural heritage, data analytics, and large-scale operational systems. Skilled in applying data-driven approaches, emerging technologies, and structured problem-solving to improve accessibility, system performance, and user experience across both cultural and enterprise environments. Background includes digitization and preservation of historical collections using AI, 3D technologies, and archival systems, alongside experience supporting high-impact digital platforms serving millions of users. Interested in advancing the integration of technology and cultural heritage systems to enhance long-term preservation and public access.

TECHNICAL & DOMAIN EXPERTISE

Digital Cultural Heritage Management | AI Applications in Cultural Preservation | 3D Digitization & Archival Technologies | Data Analytics & Data Interpretation | GIS & Spatial Data Analysis | Digital Archiving Systems (e.g., Omeka) | Augmented Reality (AR) for Public Engagement|

APPLIED & OPERATIONAL EXPERTISE

Process Optimization & Systems Improvement | Cross-Functional Program Coordination | Escalation Analysis & Root Cause Identification | Stakeholder Alignment & Communication | High-Volume Operations Management

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co, Wilmington, DE
Connected Commerce Product Delivery **Senior Associate,** ***March 2026 – Present***

Analyze and resolve complex customer-facing issues across large-scale digital commerce platforms, identifying systemic failures and contributing to improvements in platform reliability for millions of users

- Analyze recurring escalation patterns across digital transactions (e.g., checkout failures, reward application issues), identifying systemic breakdowns and contributing to long-term resolution strategies
- Collaborate with product, engineering, and third-party partners to improve platform performance and reduce repeat failure points
- Support the development of structured escalation handling frameworks to improve operational consistency and response time
- Contribute to improving communication flows between technical and business stakeholders in high-impact environments

JPMorgan Chase & Co, Wilmington, DE
Product, Experience & Technology (PXT Budget Planning Coordinator) **Senior Associate,** August 2024 – March 2026

Supported planning and execution across a **$9B enterprise portfolio**, driving coordination across Product, Design, Technology, and Finance teams.

- Coordinated cross-functional planning efforts, ensuring alignment across multiple enterprise workstreams and reducing operational ambiguity
- Developed standardized documentation and training materials to improve consistency and execution across planning cycles
- Identified recurring operational inefficiencies and recommended process improvements to enhance planning accuracy and delivery timelines
- Prepared executive-level reporting materials used in Business Unit Reviews (BURs) to inform senior leadership decision-making
- Facilitated stakeholder alignment by clarifying ownership, tracking dependencies, and ensuring timely issue resolution

Yamaha Motor Manufacturing, Kennesaw, Georgia
Project Management Intern May 2024 – July 2024

- Supported delivery of enterprise software upgrade initiatives, contributing to improved system performance and operational efficiency
- Implemented standardized project management practices, improving coordination and reducing execution delays
- Managed project documentation, including charters, scope definitions, and status reports across multiple concurrent initiatives

Atlanta History Center, Atlanta, GA
Museum Collections Intern January 2023 – December 2023

- Digitized and cataloged 8,000+ historical artifacts, enhancing accessibility for research, education, and public engagement
- Applied AI and 3D modeling techniques to reconstruct and preserve fragile or damaged artifacts
- Designed digital documentation systems (Omeka) to improve collection searchability and usability for exhibitions
- Developed augmented reality (AR) experiences to deepen visitor engagement with historical narratives
- Contributed to exhibition planning, emphasizing inclusive storytelling and representation of underrepresented histories

University of West Georgia(Anthonio Waring Archaeological Center) January 2022 – July 2024
Graduate Research Assistant

- Conducted artifact analysis and digitization using advanced archival and 3D scanning technologies, improving long-term preservation and accessibility
- Supported archaeological research and contributed to public-facing educational initiatives connecting communities to historical data
- Integrated GIS and spatial data analysis to enhance research accuracy and historical interpretation
- Assisted in developing exhibitions, translating academic research into accessible public knowledge

SELECTED IMPACT & CONTRIBUTIONS

- *Digitized and cataloged 8,000+ artifacts, improving accessibility for research and public education*
- *Applied AI and 3D modeling techniques to preserve fragile historical materials*
- *Developed augmented reality (AR) experiences to enhance visitor engagement with historical narratives*
- *Published research on AI applications in museum systems and digital transformation*

EDUCATION

- M.S., Applied Business Analytics (Data Intelligence Track), University of West Georgia, 2024
- M.A., History, University of West Georgia, 2023
- Graduate Certificate, Museum Studies, University of West Georgia, 2023
- B.A., History and International Studies, University of Ilorin, 2018

HONORS, AWARDS & FELLOWSHIPS

- UWG Arden and Danny Williams Best Student in Public History Award (2022)
- Durban Local History Museums Award of Appreciation (2023)
- UWG Graduate Fellowship (2022)
- Education Abroad Scholarship – South Africa (2023)
- Tabernacle Baptist Church Fellowship (2023, 2024)

MEMBERSHIPS

- Southern Association of Women Historians (SAWH)
- National Council on Public History (NCPH)
- American Historical Association (AHA)
- Georgia Association of Museums (GAM)
- Southeastern Museums Conference (SEMC)

PEER-REVIEWED PUBLICATION: *Leveraging Artificial Intelligence and Data Analytics for Enhancing Museum Experiences*
International Research Journal of Modernization in Engineering Technology and Science, 2024
DOI: 10.56726/IRJMETS49059

MEDIA FEATURES & THOUGHT LEADERSHIP (SELECTED)

Coverage and commentary on museum development, cultural preservation, and infrastructure challenges are published across multiple national and regional media platforms
